About Krota Studio

Krota Studio is a rota planning app designed to help teams create, manage, publish and share staff schedules in a clear and practical way.

The app supports weekly planning, daily dashboards, open shifts, staff profiles, multiple locations, holiday records, breaks, reports, account access, printing, PDF export, spreadsheet import and export, and calendar sharing.

Krota Studio is intended to make rota planning easier, faster and more organised while keeping the final rota simple for staff to read.

About the creator

Krota Studio was created by Klerk Mutima. The app reflects a practical approach to rota planning: clear schedules, useful controls, location awareness, and simple sharing for teams.

For feedback, support questions, business enquiries or suggestions, please use the contact details listed at the top of this document.

Terms and conditions

By using Krota Studio, you agree to use the app responsibly and only for lawful rota planning, staff scheduling and related business administration.

You are responsible for checking the accuracy of rota information before publishing, sharing, printing or exporting it. This includes staff names, working hours, holidays, breaks, locations and access permissions.

The app is provided to help manage scheduling, but it does not replace professional legal, payroll, employment, tax or HR advice. Users should make sure their rota decisions follow the rules, contracts and laws that apply to their organisation.

You should not upload, store or share information that you do not have permission to use. Account administrators are responsible for inviting the right users and choosing suitable access levels.

Fair use of the app

Fair use means using Krota Studio in a reasonable way for genuine rota planning and team management.

Do not misuse the app to spam, harass, mislead, overload services, attempt unauthorised access, copy private data, or interfere with other users or systems.

Do not remove creator notices, pretend to be the creator, resell the app without permission, or use the app in a way that damages the reputation of Krota Studio or its creator.

Keep backups of important rota data and review exported files before sending them to staff, managers or external services.

Privacy and data responsibility

Rota data can include personal information such as names, working patterns, holidays, contact-linked accounts and access levels. Users and administrators should handle that information carefully.

Only invite people who need access, remove access when it is no longer needed, and avoid sharing rota exports with people who should not see them.

If your organisation has its own privacy, HR or data protection rules, use Krota Studio in a way that follows those rules.

Contact

For help, feedback, corrections or questions about Krota Studio, contact Klerk Mutima by email at klerkmutima@yahoo.com or by telephone on 07497754355.
